

White Powder Gold

an adventure into expanding consciousness

Transcription of the introduction to the White Powder Gold workshop
Barchem, September 2006
Told by John Armitage, also known as Hari Baba

The history of White Powder Gold goes back to the Pharaoh's in old Egypt, Moses and King Salomon. Along the river Nile you can find temples with wall paintings, where a priest is offering the Pharaoh a kind of bread, in the form of a pine cone. And the well known freeze of Acanaton blessing the bread in the rays of Aton. Other paintings show a priest with white powder coming out of his hand. And a temple in the Sinai was discovered, with a lot of white powder lying around. It looked like people had left in a hurry, hiding as much as possible under stones. Now we know it was White Powder Gold, we will call it WPG.

Bring in the Light

WPG causes an alchemical change in the body; it creates a transmutation in the cellular structure, with the effect that the cells hold more light. To ascend, you have to have a degree of light in the physical body. WPG works on all multidimensional levels. It is pure alchemy.

Dormant senses

WPG activates dormant senses; everyone has the ability to be clairvoyant, clair-audient etc. Everybody could see aura's until programming took place; we ignored it, being too busy 3D business.

What you see and feel however depends on how many senses you have active. WPG helps you to increase the number of active senses from 5 till 12.

This is a way to so called "spiritual activity".
It has nothing to do with holiness.
It is the message of wholeness: being whole.
This is a fabulous piece of news.
It is time to bring the Alchemy into the public arena.

How else was WPG used?

The Arc of the Covenant was a chest with a lid made of pure gold. With two statues of angels with a terrific amount of gold in it. In those days a huge amount of gold was around; when Moses was on top of the mountain, people made a calf of gold. We know that the Arc of the Covenant existed. When the Knights Templar took Jerusalem, they found the Arc of the Covenant but the cover was missing. The Arc of the Covenant went to France. It is said that in the old days the lid of the Arc of the Covenant was used to make WPG. To produce WPG you need a huge amount of gold; during the process a high percentage of gold is transformed.

King Solomon

King Solomon was very well known as an alchemist and a magician being involved in ritual magic. He too had the knowledge of making WPG.

In the Bible some songs are known as Songs of Solomon; these songs were used in magical rituals. If you read them carefully, you could work out what these songs were used for. Psalms and Songs of Solomon still have the energy encoded in them and you can use them in daily life for what they are really for. For instance the Psalm... The Lord is my Shepherd means: I am open and willing to receive the abundance of Creation. No difference with making affirmations as we do nowadays.

Moses and Manna from heaven

Moses was wandering around in the desert for forty years. How did they live? In the Bible is said that they were eating manna from heaven. In fact they were all eating WPG every day.

Why do we eat? We eat because we have lost the ability to process prana (life energy). Plants process prana and store the prana. We get our daily dosage of prana by eating plants. Quick growing trees store little prana; when we burn them, they give little heat. Old, slowly growing trees are really hot: over the years they stored a tremendous amount of prana and release it.

Some people on the planet can live without eating because they have activated their prana receptors. WPG activates the prana receptors. I am not suggesting stopping eating at all; when using WPG you do need less food though.

Harmony and balance of the aura

WPG has a solid impact on the aura or the energetic emanations of the physical body. It reprocesses the harmony and balance and stops you from recycling your own thought forms. It helps you to come to the conclusion that fear is an illusion.

Light body

In Lemurian times we lived in our light bodies, before planet Earth was solid. We had no gender, we were androgynous beings. Our I am Presence is neither male nor female. The reason why we have two bodies, the male and female body, is for

breeding purposes in the third dimension. Identification with gender creates imbalance. People have a tendency to identify with the body; they think that God is upstairs and they live in a mode of separation and duality. WPG assists us in clearing the information in our light bodies about separation.

Lifting the veils

Reality is a screen in a movie theater, a huge screen that surrounds us. They rolled down a curtain, so you can see only a spot of the whole screen. You are looking through a funnel and you think that what you see is the whole reality. We are running around like chickens without a head, headless chickens. We don't know what we are supposed to be doing because of the lack of being connected to what we really are; by thinking we are separate.

Metaphorically speaking, WPG rolls up the curtains. The result is that you are beginning to understand Creation; the codes that limit consciousness are reset. The veils are lifted; you are starting to have a conscious connection with your I am Presence and your Monad.

Multidimensional bodies

WPG has a strong impact on the multidimensional bodies.

Some people think that on the 8th level, where our I am Presence resides, everything is harmony and balance. We know by now that our I am presence is not free of ego related phenomena. WPG helps us to transmute these aspects and build a connection between your I am Presence and your Monad.

DNA

WPG gives you another expansion by activating more strands of DNA.

Scientists came up with the conclusion that we have twelve strands of DNA; two are active, so they call the other ten strands "junk DNA". In fact these strands can be activated and by activating them we get a stronger connection with Divine Source.

DNA strands are crystalline structures transmitting and receiving information. They have caps on the top and the bottom, so their functioning is shut down.

WPG consists of gold in a monatomic state and we add rhodium and iridium to it.

Rhodium and iridium take the caps away from your DNA. WPG helps you in restoring the functioning of your DNA in transmitting and receiving information.

A test can be done by DNA fingerprinting: after three weeks of using WPG the profile is changed, you will be a different person.

Antakarana

WPG opens up your Antahkarana, that is to say, the tube through which you transmit and receive energy.

Brain balancing

Our brains have a right side and a left side.

The left side is quite mental, where we do the logic and the reasoning.

The right side is quite spacey, it is the place where we are channeling and creating.

The left side is connected to the lower chakras and the right side of the brain is connected to the higher chakras.

Between the two hemispheres we have a connector which connects the two sides.

WPG activates the balancing of the two sides of the brain through the connection.

Expanding consciousness

A lot of people looking for ascension are escape artists.

We have to be consciously present here, grounded on planet Earth.

Expanding our consciousness, be more self-realized beings.

The word “believe” means that you think God is outside of you.

Believing is the urge to integrate the Divine energies.

What you experience after integration is not a belief, it is reality.

Higher Authority

A lot of people are always looking for a higher authority, outside of themselves.

We are programmed to give our power away to the experts.

Take the power in your own hands

Take responsibility for yourself

Stand in your own power

Refer to yourself, to your I am Presence

Everybody is connected to his or her I am Presence

If you are separate from your I am, you are dead.

WPG as a tool

Don't give your power away to WPG, or to anything.

WPG is a tool. If I want to fix my car, I take the tool box out. The toolbox is not the repair itself; it might assist you with the repairing of the car only.

WPG, systems and meditations are designed to lead you on the road to self-realization. Until you come to a point where you realize you need nothing ... because you are everything.

Buddha received enlightenment when he gave up searching; he sat under a tree and looked within.

Panta rei

As the energy of the universe changes, we change.

There is never to be a place where we stop changing, sitting on a cloud.

You are changing for ever. Until the end of Creation you will change.
We made an enormous progress during the last 40 years.
We have moved so far, so quickly using White Powder Gold.

Health warnings

Be careful in using White Powder Gold.

Why? Because WPG affects your Light body, the meridians, the chakra's, the spine and the DNA.

Most people can't deal with activating of all dimensional levels and changes in consciousness in one go.

People loose connection with reality.

You might burn out your energy system.

The body is not used to the energy running through it. In case of an overdose, the effect might be as bad as in case of an uncontrolled Kundalini activation.

Be careful

WPG can assist you in your ascension process.

Asking for instant ascension is like thinking you can run up a mountain in one go.

Don't forget that if you want to run up a mountain, you need some training, starting with one step, and another step etc.

Take it easy and follow your guidance.

Symptoms of an overdose

Symptoms of an overdose are:

- sleeplessness
- headache
- dizziness
- ringing in the ears
- changes in colors seen
- changes in blood pressure
- disconnection with so called reality

WPG activates the balancing of the two sides of the brain, so we might experience headache and dizziness. Our receptors are activated, so you might see or hear something different. The heart is opening and you might feel spacey, floating around.

The answer is: ground yourself.

How? Through intention.

Bring your focus to the Earth Star, a hand width below your feet and say:

Activate Earth Star, 3 times.

Dosage

The dosage depends on the person.

A good way of getting the answer is by muscle-testing, or asking your Guidance.

Take your own responsibility.
If you miss a dosage for whatever reason, just skip it.

How long can you take it?

As a general rule you may start for a month and then take a rest for a few months.
Follow your Guidance.
If you find yourself too spacey and full of emotions, you might consider reducing the dosage.

If you find yourself angry, don't be judgmental, don't judge yourself.
Being angry might be an invitation to find a solution in your emotional system. Look at the gift in it, accept it and move on.
"Now I can see how I relate to my anger, accept it and let go ... transmute, transmute
....

Standard medical answers

The regular medical profession doesn't know how to treat these phenomena.
When a child is seeing angles and goes to the doctor asking:
Why do I see all those things?
The doctor will say: that is not normal; you have to take these pills.
Or they put you in a place with other people who are seeing things.
Or people complain: I hear voices.
The doctor will say: you need a treatment and they make money out of it.
Other people pay money and go to workshops to hear voices.

Follow your guidance

Nobody outside yourself can give you a dosage or a timeframe.
Just be careful and gentle to yourself.
Follow your guidance and take your own responsibility.
You will be successful if you succeed in integrating things you have to integrate in this life.

WPG as a homeopathic remedy

White Powder Gold of Shamballa Multidimensional Healing® is made as a homeopathic remedy. We work with the energetic signature of WPG and copy it into a homeopathic dilution with a potency of 12 CH. With every dilution you make you release a harmonic of the life force energy. We have chosen for a lower vibration for the simple reason that the lower the potency, the more it works on the physicality first. WPG of Shamballa MDH® works on the physical cellular structure first and then into the aura and other energetic bodies, meridians etc. according to your own will and the will of your I am Presence. WPG of Shamballa MDH® is pure life force energy of White Powder Gold; stronger, more pure and cleaner than the original substances.
